CHIEF COMPLAINT

Mr. Thompson is a 65 y/o White Male presenting with chest tightness and exertional dyspnea for the past 3 days.

HISTORY OF PRESENT ILLNESS

Mr. Gerald Thompson, a 65-year-old retired firefighter from Columbus, Ohio, presents with a 3-day history of progressive chest tightness. Onset was gradual, occurring first during his morning walk (approximately 1 mile). Pain is described as pressure-like, rated 6/10 at peak, located substernally with radiation to the left jaw. Episodes last 10–15 minutes and are relieved by rest. He denies nausea, vomiting, or diaphoresis. He reports mild shortness of breath concurrent with chest symptoms. He was last seen by Dr. Patel 6 months ago for routine follow-up of hypertension.
