ST. AUGUSTINE MEDICAL CENTER

Department of Orthopedic Surgery | 800 Medical Center Pkwy, Phoenix, AZ 85004

DISCHARGE SUMMARY

Patient:	Edna Mae Kowalski	**MRN:**	SAMC-103847
DOB:	01/09/1941 (Age 82)	**SSN:**	557-23-6610
Admission Date:	10/15/2023	**Discharge Date:**	10/22/2023 (7 days)
Address:	5501 Desert Bloom Ct, Scottsdale, AZ 85253	**Phone:**	(480) 555-0271
Emergency Contact:	Robert Kowalski (son) — (480) 555-3344	**Insurance:**	Medicare #1EG4-TE5-MK72
Admitting Dx:	Left hip fracture	**Discharge Dx:**	Status post ORIF left hip
Attending:	Dr. Priya Nair, MD (Orthopedics)	**PCP:**	Dr. Frank Deluca, MD

REASON FOR ADMISSION

Mrs. Kowalski, an 82-year-old female, presented to the ED on 10/15/2023 following a mechanical fall in her bathroom at home. X-ray confirmed a displaced left femoral neck fracture (Garden Type III). She was admitted for surgical management.

HOSPITAL COURSE

10/15: ED evaluation, pain management with IV morphine, orthopedic consult, pre-op clearance. Cardiology cleared for surgery (EF 55%, NSR on EKG).

10/16: ORIF left hip performed under spinal anesthesia by Dr. Nair. Procedure without complications. Estimated blood loss 250 mL.

10/17–10/18: Post-op monitoring. Patient mobilized with physical therapy (walker, partial weight bearing). Pain controlled with Oxycodone 5 mg PRN and scheduled Acetaminophen.

10/19–10/21: Progressive weight bearing. OT evaluated home safety. Enoxaparin 40 mg SQ daily for DVT prophylaxis started. Wound healing well, no signs of infection.

10/22: Cleared for discharge to skilled nursing facility (Sunrise Gardens SNF, 1200 E. Camelback Rd, Phoenix, AZ 85014). Daughter-in-law Linda Kowalski present for discharge teaching.

DISCHARGE MEDICATIONS

Medication	Dose	Frequency	Duration
Oxycodone	5 mg PO	Q6h PRN pain	7 days
Acetaminophen	650 mg PO	Q6h scheduled	14 days
Enoxaparin	40 mg SQ	Once daily	21 days post-op
Omeprazole	20 mg PO	Once daily	Ongoing
Calcium + Vit D3	600 mg / 400 IU	Twice daily	Ongoing
Alendronate	70 mg PO	Weekly	Ongoing

FOLLOW-UP INSTRUCTIONS

1. Follow-up with Dr. Nair in 2 weeks (10/36/2023) for wound check and X-ray — call (602) 555-1900 to confirm.

2. Continue PT/OT at SNF. Goal: independent ambulation with walker within 4 weeks.
3. DEXA scan scheduled 12/01/2023 — osteoporosis workup.
4. No driving until cleared by orthopedic surgeon.
5. Return to ED if: increased pain, fever >38.5°C, wound redness/drainage, or leg swelling.
